

iPLATINUM is pleased to announce iFerret v3.0

iFerret v3.0 is ready to hit the streets and with it comes a host of enhancements that will make finding corporate information quicker and even simpler than it has been with previous releases.

The key strengths of iFerret have always been its ability to easily find corporate data and there are now over 50 councils experiencing this business transformation.

The standard features remain including:

- Expansive search and retrieval capability
- Single point of access to corporate information
- Supporting a broad variety of data sources (email, email archives, networks shares, Records Systems, Property and Rating Information, CRM and more...)
- Scanned image support
- Preservation of application security details
- Auto Freedom Of Information, Requests For Information and Government Information Public Access packaging
- Duplicate document identification
- Full audit trail
- Installed as a “turnkey” solution
- Enablement of remote information access

In addition, we have now delivered a new user interface (UI), a large number of new system connectors and various enhancements to improve useability and performance.

The big ticket item is the new UI which now gives the solution a more modern and contemporary feel.

If you would like to schedule a virtual demonstration of the new solution please lodge a request via info@iplatinum.com.au.
